
RESOURCES

- **Read Karen's book extensions at http://www.kcenamels.com/enamel_book2**
- **AAE Glass—<http://aaeglass.com>**
Sells decals in black, white, and gold. Also sells Illusion Transfers, which work like decals, and Mica Illusion Transfers, which are like luster decals. Sells enamels and stencils and stickers and Thompson enamels.
- **Allcraft in NYC—<http://www.allcraftusa.com/>, 800-645-7124**
General jewelry and enamel supply including Thompson enamels.
- **Amazon—amazon.com**
Ferric chloride, stencils, and many other items.
- **Analytical Scientific—<https://www.analyticalsci.com/>, in San Antonio, TX 210-684-7373**
Ferric nitrate crystals for etching fine silver and sterling (neutralize with ammonia).
- **Artz, Steve—enamelartz@cox.net**
Steve sells his holder for MAPP gas set up for torch firing. Get Torch #TS8000KC Premium Torch Kit and WH0159 Universal Torch Extension Hose at Home Depot.
- **Bel Inc.—<http://designbiz.com/Biz/bizProfile.asp?CompanyID=60529>, in Miami, FL 305-593-0911**
Sells laser water-slide clear decal paper for making your own decals with a laser printer. They also sell decal paper for nonfired applications like candles. I think they also will print custom decals.
- **Brinker's Studio—brinkerstudio@gmail.com**
Supplier of engine-turned precious metals for Guilloché.
- **CAD Print Services—Shapeways.com, i.materialise.com**
- **Captive Decals—
<https://www.ebay.com/str/captivedecalsakacaptiveillusion>**
Sells decals for fused glass, which can be used for enameling. Very good to work with for custom designs.
- **Cre-Fab—<https://coppershapesforenameling.com/en/>**
Copper shapes for enameling.
- **E-namels—<http://www.e-namels.com>**
Sells old Thompson leaded enamels, flower wafers, Ferro Sunshine paints, enamels from many manufacturers, and more.
- **Enamel Art Supply—<https://www.enamelartsupply.com>**
Owner Mack Rae, 831-761-2844, sells leaded enamels and more.
- **GlassHopper Patterns—<https://www.glasshopperpatterns.com>**
Get Dicro Slide decal paper and Dicro Slide Frit.

- **Glonation—**
Developed glow-in-the-dark powders that can be fired at 1450°–1500°F. The product is strontium aluminate; avoid pinks, reds, and oranges, as they might contain zinc sulfides, which are not good to breathe. The original website is no longer active, but the powders can be purchased on Amazon.
- **Go Fusing—<https://www.GoFusing.com>**
Sells decals and Dicro Slide decal paper and Dicro Slide Frit.
- **Gold Leaf and related material suppliers, also check enamel suppliers:**
 - Daniel Smith (Seattle store)—206-223-9599**
 - Fine Art Store—Fineartstore.com**
 - Gilded Planet—GildedPlanet.com**
 - L.A. Gold Leaf US—<https://www.lagoldleafus.com>**
Sells gold and other metal leaf. Be aware that not all are real metal—only use pure metal for enamel. Also sells edible gold powder and flakes.
 - Sepp Leaf—<http://www.seppleaf.com> in NYC**
- **Granule Supplier—scientificalloyscorp.com**
Christopher Pian, Scientific Alloys; 973-478-8323, Cpian@scientificalloyscorp.com
When ordering from them, specify the diameter of the granules and they custom make them. They do have a minimum order. More expensive than making them yourself, but less time consuming if you need a lot.
- **Hauser and Miller—<http://www.hauserandmiller.com>**
Precious metals.
- **Hoover and Strong—<https://www.hooverandstrong.com>, 800-759-9997**
Fine metals, gold, and silver.
- **Liquidreflector.com**
Sells two different sizes of reflector beads, both of which adhere well to an enameled surface.
- **McMaster-Carr—<https://www.mcmaster.com/#304-stainless-steel-wire-cloth/=15b7v6m>**
Has screen mesh sizes to make your own sifters. Sample pack is # 9231T12.
- **Metalliferous in NYC—888-944-0909; <http://www.metalliferous.com>**
General jewelry and enameling supplies. Sells fine silver discs in a variety of diameters and gauges. Sells silver (fine and sterling), not gold. Has a very good selection of copper cutouts, normally all in stock.
- **Micro-Mark—<http://www.micromark.com>**
Ferric Chloride + lots of interesting tools including small tools.
- **Milestone Decal Art—<http://www.milestonedecalart.com>**
- **Moon Metalsmithing—<http://www.MoonMetalsmithing.com>**
Spun copper and silk forms, chiseled engraving.

- **MUD—by MargotClark.com**

Buy MUD, the material to make a cameo effect on enamel. Start with buying the kit.

- **Nasco in WI and CA 800-558-9595—<http://www.enasco.com>**

Ferric nitrate supplier.

- **Otto Frei jewelry supplier—Ottofrei.com**

General jewelry supplier.

- **Pam East**

<https://www.cooltools.us/Enameling-Basics-by-Pam-East-s/2544.htm>—
videos on enameling and enameling tool use.

<http://www.metalclaysupply.com/Books-Videos-s/28.htm>—videos and
tools on metal clay and enameling. Link is for the videos on copper and
silver clay, but look around site for her trivets and more.

- **Profusion Glass—<http://www.profusionstudioglass.com>**

Mainly a fused glass site but sells decals, including the Shimmer Decals that give the look of Thompson Enamel Lusters—watch Profusion's video for ideas on combining these. I have not tried them but see no reason why they won't work. I'll be trying them soon!

- **Rio Grande in NM—800-545-6566, <http://riogrande.com>**

Jewelry tools/displays/gems/beads and enamels supplier.

- **Saral transfer paper— <http://www.saralpaper.com/main.html>**

Helps get design onto fused enamel. Use the *red* only, and it will burn off in the kiln. Comes in sheet and rolls. Try getting on Amazon.com.

- **Schlaifer's Enameling Supplies—800-525-5959; <https://enameling.com>**

General enameling supplies and old Thompson leaded enamels and new Thompson unleaded enamels. Good selection of copper cutouts. Has the best light switch plate selection—nonstandard style with rounded edges, and for the *décora* type, has a variety of layouts.

- **School Specialty—SchoolSpecialty.com, 800-481-5108**

36 ga copper foil (sku 405809)—I bought through Amazon and it was labeled St. Louis Crafts.

- **Science Company—800-372-6726;**

<http://www.sciencecompany.com/Ferric-Nitrate-100g-P6384.aspx>

Sells ferric nitrate.

- **Stamping Out Loud—StampingOutLoud.com**

Copper, plus three other metal, cut outs with very good edge finishing and options to include hole(s).

- **T. B. Hagstoz & Son Inc. in PA—hagstoz.com, 800-922-1006**

Fine metals including Cloisonné wire.

- **Thompson Enamel in KY—859-291-3800; <https://thompsonenamel.com>**

General enameling supplies. Manufactures enamels. Sells flower wafers.
